Art Unit: 1614

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 15-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over the ~~Adams~~ ^{Peat} etal reference of record taken with the ~~Adams~~ ^{Peat} patent of record, ~~the Adams~~ ^{the Peat} etal, reference disclose application's compound, 5-androstene-3B, 17~~B~~^B diol (page 4038, col. 1, table 1) as having pharmoeutial import and teaches the s.c. administration of the 5 - androstene -3B, 17B - diol to female rats. The ~~Adams~~ ^{Peat} patent teaches applicant's compound generically and in the form of a tablet or pill form. The reference does not teach the tablet or pill form of the compound. Therefore, one skilled in this art would be motivated to form the tablet or pill form of the prior art compound which has pharmaceutical import with a reasonable expectation that said compounds would be effective for a pharmaceutical purpose.

Claims 15-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 15-20 are indefinite in failing to recite the intended application of the composition.
